

Google Doc Teacher Resources

Atoms Game

Each link listed here is a link to the specific Google document, which will ask you to make a Copy for your own Google Drive when you open it. You must be logged into a Google Account to access these documents.

A few notes:

- These documents are actually made within Google Slides, so that students may use the text boxes and other drawing tools to interact with the content, without being able to alter it.
- If students have trouble dragging images where indicated, please recommend that they Zoom In, to make the images larger.
- When assigning these documents within Google Classroom, please choose the “Make a Copy for Each Student” option. This will automatically attach the document to EACH student’s assignment including with their name, and you will be able to see ANY progress the student has made on the assignment, even if they do not “Submit”.
